

APPLICATION:

The branching assemblies BOCL are used in combination with DMES and DMPS for the construction of a branching joint with more than two cables.

FIRST SUPPLY KIT:

- One branch Off Clip (BOCL), identical to the one included in the DMES assembly for DA-1 and the one included in the DMPS assembly for DA-2.
- One piece of flexible, stranded, insulated cable type NYAF 2.5mm², with one end fitted with a "crocodile clip" type terminal according to your requirements.
- One cable connection clamp for 2.5mm² cables, allowing connection without stripping the insulation.
- One piece of emery cloth measuring 200x25mm.
- One piece of adhesive aluminum foil measuring 250x80mm.
- Two plastic cable clamps (tie -wraps).
